

KEITH® CleenSweep® Tarp Systems

Material Clean Out Systems for Moving Floor Trailers

KEITH the first name in Unloading.

Why Choose a KEITH Trailer Sweep System?

For years, haulers have created their own clean-out systems for moving floor trailers using tarps, wood headboards and other materials. Many may clean the trailer, but require the operator to enter the trailer to reset the system. This creates a potential safety hazard, as there is a risk of injury each time the operator enters or exits the trailer.

The KEITH® CleenSweep® automatically retracts and resets, with no need for the operator to enter the trailer.

How it Works

KEITH® CleenSweep® systems are powered by the moving floor and travel at the same speed as the material unloading. The bulk material's weight on the tarp pulls the sweep system with the load. An automatic retrieval system returns the sweep to the front of the trailer.

KEITH
MANUFACTURING CO

KEITH® CleanSweep® Systems

Material Clean Out Systems for Moving Floor Trailers

CleanSweep® Electric System

(For use with Tarp only)

- Easy Installation and Operation
- Compact Design
- Battery Operated- Charges off Trailer Power
- No Hydraulic Hoses

CleanSweep® Hydraulic System

(For use with Headboard or Tarp)

- Powered by Strong Motor
- Hydraulic Winch Uses Same Oil As Floor
- Powerful System for Heavier Materials
- No Electrical Wiring
