

Updated V-FLOOR® Slat

New Design Advantages:

(1) Less resistance on non moving flat bar:

- More floor surface moves the load.
- Up to 94% of floor surface is moving vs. 75% with original design.
- Improved cleanout.
- More efficient unloading on an incline.
- Opportunity to haul/unload greater variety of materials.
- Improved performance in freezing conditions.

(2) Additional bearing surface:

- Full length bearing surface supports each slat.
- Twice as much bearing surface in contact with slats.
- Longer slat life.
- Longer bearing life.

(3) Improved Design:

- Bearing design reduces the chance of material build up.
- Light weight- up to 4lbs/ft weight savings compared to original design.
- End of bearing "traps" flat bar, simplifying installation.
